

## ECONOMIC SNAPSHOT: NEW YORK

*\*\*Includes Bureau of Labor Statistics jobs and unemployment data through July 2014\*\**

### JOBS

- In July, private-sector employment in New York grew by 17,300 jobs. Over the past year, the New York private sector has added 118,900 jobs. This compares with an increase of 155,000 jobs over the 12 months ending in July 2013.
- New York private-sector employers have added 618,300 jobs (an increase of 8.9 percent) since February 2010, the national low point for private-sector employment.
- In New York, the following sectors have posted the largest job gains since February 2010: education and health services (170,200 jobs), professional and business services (146,400 jobs) and leisure and hospitality (124,800 jobs).
- The New York sectors with the greatest job gains in percentage terms since February 2010 are: leisure and hospitality (17.3 percent), professional and business services (13.5 percent) and education and health services (10.1 percent).

### UNEMPLOYMENT

- The unemployment rate in New York was 6.6 percent in July 2014, holding constant from June. The rate is down 1.1 percentage points from one year earlier and is below its recent peak of 8.9 percent in February 2010.
- 631,800 New York residents were unemployed during July 2014, down from a recent high of 852,800 in January 2010. There are still 179,300 more people unemployed in New York than when the recession began.
- In New York, initial claims for unemployment insurance benefits totaled 92,710 during June, down 0.2 percent from the previous month. Total initial claims over the past 12 months are down 14.4 percent from their level over the 12 months before that.

### EXPORTS

- In New York, exports totaled \$7.7 billion in June and \$81.5 billion over the past year, down 1.3 percent from the 12 months ending in June 2013 (inflation-adjusted dollars).
- New York exports over the past 12 months are up 18.7 percent from their level in the same 12-month period four years earlier (inflation-adjusted dollars).

### HOUSING

- Home prices in New York increased by 1.4 percent from the first quarter of 2013 to the first quarter of 2014 (the most recent quarter for which data are available). They are up 2.3 percent since their recent low in the second quarter of 2012 but remain 11.4 percent below their pre-housing-crash peak.
- Housing starts in New York totaled 26,720 units (seasonally adjusted annual rate) in June 2014, a decrease of 5.7 percent from May.
- Within the Northeast census region, which includes New York, sales of new single-family homes totaled 24,000 units in June 2014, a decrease of 20.0 percent from May. Sales of existing single-family homes increased by 3.9 percent to 530,000 units (at seasonally adjusted annual rates) from May to June 2014.

## How Does New York Compare to Other States?

Workers across the country were hit hard during the recent recession. Since then, employment in some states has returned to pre-recession levels, while employment in other states remains below pre-recession levels. The chart below allows for a comparison of New York to other states using two metrics.

The unemployment rate (measured along the horizontal axis) serves as a gauge of current labor-market conditions in New York, while net job gains since the recession began (current nonfarm jobs as a share of jobs prior to the recession) measures progress toward labor-market recovery (vertical axis).

States falling in the upper left quadrant have net job gains since the start of the recession and unemployment rates lower than the national unemployment rate. States falling in the lower right quadrant have higher unemployment rates than the United States overall and are still experiencing net job losses relative to pre-recession levels.

Note: The figure above excludes North Dakota, which has a current unemployment rate of 2.8% and net job gains totaling 28.5% since the start of the recession.
